

The new CD release from the L&M Rhythm Kings. November 2018

The L&M Rhythm Kings proudly present their debut CD of original compositions, offering their original take on blues, R&B, and roots music, while at the same time honoring those traditional forms. This is original songwriting wrapped in the traditions of electric blues and featuring the tight grooves of American roots rhythm and rock.

The players share a tight, instinctive, and spontaneous interplay that comes only from decades of playing together. While this is the band's first album of recorded music, they've worked live shows for nearly ten years. And more, the players have worked together in different combinations since very long before that. Having played together for so long, these guys know each other's styles inside out and it shows in the tightly focused performances and arrangements of these songs.

The band is joined on two tracks by award winning and internationally famous blues guitar legend **Ronnie Earl**. Ronnie has mentored the band generously and is no less than a spiritual member. And **Chris Vachon**, master guitarist and leader of famed blues outfit **Roomful Of Blues**, contributes guitar on one track, but also produced, recorded, mixed and mastered the album. Yet this is not an all-star album; rather, it's a cohesive group of songs written and performed by a tight, seasoned group of club-crawling musical veterans at the peak of their powers. Enjoy!
